BEYOND USE DATE STUDIES

Fagron is on a mission to offer the most robust HRT Cream bases on the market. Currently, our Phytobase has a USP <795> new guideline compliant bracketed study on estriol, estradiol, estrone, progesterone, testosterone and progesterone/estriol/estradiol combinations. Fagron is also in the process of updating the HRT Heavy study to be new guideline compliant while adding new combinations to the HRT Heavy study and the existing Phytobase study!
