

Oral Syrup and Suspension Vehicles

Now available from Letco Medical!

new

Great compounded oral prescriptions start with the right vehicles

Letco is proud to introduce these convenient syrup and suspension vehicles, formulated to greatly assist compounding pharmacists in the preparation of oral extemporaneous delivery systems. They are preserved and buffered to help minimize common degradation and to provide a vehicle which is consistent, dependable, pharmaceutically elegant and easily utilized.

Letco's syrup and suspension vehicles are formulated to provide maximum drug compatibility and assure stability in liquid dosage forms. Also, for those patients who are allergic or sensitive to a specific ingredient in a vehicle, we have sugar-free, saccharin-free, dye-free, flavor-free and paraben-free products. Mix with any of Letco's various flavor products to create a patient preferred flavored compound or just to mask bitter, metallic or acidic aftertastes.

Letco Medical's oral syrup and suspension vehicles are manufactured to exacting standards using the highest quality ingredients and professional knowledge for optimal compounding performance. Contact us for additional base specifications and ideas/advice on how to incorporate into your existing compounding formulations.
