Automated-Metered Dosing
• Audible, Tactile and Visual CLICKs indicate measure of dose at each point of the unique triad shaped base
One CLICK = 0.05 mL

Accurate & Consistent Dose™
• Topi-CLICK® dispensers proven most accurate among others tested by *ARL
• Eliminates user-variability
• Consistent automated dosing throughout treatment

Automated-Metered Dosing
• Audible, Tactile and Visual CLICKs indicate measure of dose at each point of the unique triad shaped base
One CLICK = 0.05 mL

Targeted Topical Therapy
• Innovative triad shaped dispenser allows for precision handling during application
• Applicator reduces the risk of hand transference to others
• Offers applicator selections for customized dosing

Viscosity Assurance™
• Accuracy NOT affected by varying formulations
• Accuracy NOT affected by varying bases

Dispense/CLICK: 0.05 mL  Approx. Residual: 0.15 mL
Delivery Volume: 1 mL to 9.75 mL

Made of FDA grade materials | Phthalate free | UV block and is Recyclable 🌿

Letco MED
LET US HELP.
User Instructions

☑ Automated-metered topical dosing provides an accurate and consistent dose every time
☑ Audible, Tactile and Visual CLICKs indicate measure of dose (no need to manually mark dose)
☑ Innovative TRIAD shape allows for precision handling
☑ Built-in REFILL Badge helps patients reorder medication on-time

STEP 1: Unscrew the cap of the Topi-CLICK® Micro™ and set aside for recapping after use.

STEP 2: Holding the Micro™ in an upright position, turn/CLICK the Base the number of CLICKs or mLs specified on the prescription label. Use the Audible, Tactile and Visual CLICK points of the triad shaped Base as dosing indicators. Be sure to align Base with the Triad Tube to ensure dose is fully dispensed.

STEP 3: Apply topical medication with built-in applicator as directed by physician or pharmacist. Continue rubbing until preparation is completely absorbed into the skin. IMPORTANT: The built-in applicator lessens the risk of transference to unintended areas. No need to use your fingertips to apply medication.

STEP 4: Screw-on cap after each dose to prevent evaporation. Be sure cap is secured completely.

The Refill Badge™ reminder system helps patients reorder in a timely manner.

When the TOP black line of the Plunger reaches the embossed line below the word “REFILL” approximately 32 CLICKs are left. Approximately 12 CLICKs remain at the line above the word “REFILL.”

Note: Follow instructions on prescription label before use. Topi-CLICK® Micro™ is not re-fillable.

**Topi-CLICK Micro**

**Filling Instructions**

Micro Quick-Fill Technology™

Makes Filling Fast & Simple

1. **BEFORE FILLING**

Prime syringe or EMP Jar to insure only medication (no air) is loaded into the Micro™.

2. **FILLING**

   - **Note:** Graduated Lines are for filling only and not for patients. Top black line of the plunger indicates Fill Volume. The embossed Refill Badge helps patients reorder medication in a timely manner.

   - Syringe Tip-to-Tip Filling:
     Screw Luer syringe to the Luer opening of the Micro™. Requires no extra Luer Lock adaptor.

   - EMP Jar Quick-Fill Adaptor™ Filling:
     Screw-on EMP Jar Quick-fill Adaptor™. Fill topical medications directly from mixing jar with this added Micro™ accessory.

3. **APPLICATOR TIP ATTACHMENT**

   Press on by pushing at a 90 degree angle (important) against a hard surface.

   **Select one of 3 applicators**

   - Soft Angled Applicator™
   - Pin Point Applicator™
   - Rounded Applicator™

   **Note:** Soft Angled Applicator™ placement requires tip to be aligned where lower slant of tip is on the same side as **REFILL Badge** of the Micro™ tube.

4. **PRIMING MICRO™**

   Applicator Tip must be attached before priming. Prime the Micro™ by turning/CLICKing the base until contents are dispensed, then wipe off. Be sure to align Micro™ base with the triad tube. **Approximate Priming:** 0.10 mL or 2 CLICKs.

5. **CAP PLACEMENT**

   Screw-on Cap securely to prevent evaporation.

6. **LABEL APPLICATION**

   Apply label to the bottom side of the Topi-CLICK® Micro™, opposite the “REFILL Badge” indicator.

Topi-CLICK Micro

DoseLogix Laboratory Test Results
Prototype 170706-1

Product performed per design specifications. Device is both highly accurate and precise, demonstrating dosage tight variance as well as an average dose being +1.29% greater than the rated. Product performance variance was reduced for two CLICKS versus one CLICK.

Product prototype 170706-1 qualifies inspection and is passed.
